Job Description

Job Overview:
Your responsibility as technical lead of the logistics solutions team, will be responsible for supporting all aspects of logistics software, and operations, ensuring smooth and efficient technology support for our users and business needs. Will be involved in implementation and development new solutions such as WMS, TMS or any other logistics or supply chain solutions.

Main Responsibilities:
- Engage in the development, implementation and support of logistics package software developed by our APAC clients.
- Participate in full project life cycle from requirements gathering to project implementation, maintenance and support for our client developed logistics applications (VB.Net/Java).
- Ensure that the developed modules/deliverables meet expectation, quality standards and within schedule.
- Maintain applications according to SLAs and solve complex performance problems and bug fixing.
- Participate in continuous integration activities and automation framework for testing and deployment.
- Document and maintain design specifications, source code, and archives for new applications and ideas.
- Commit to continuous improvement and refinement of global methodology and delivery.
- Provide technical guidance and lead team members.
- Work closely with stakeholders to gather and refine project requirements.

- Conduct code reviews to ensure code quality and adherence to standards.
- Continuously discover, evaluate, and implement new technologies to maximize development efficiency.
- Stay up-to-date with emerging trends and technologies in software development.

Job Requirements:
- Candidates must possess at least Bachelor Degree, Professional Degree or Master's Degree preferably in Computer Science, Information Technology, or any other equivalent.
- Minimum 5-7+ years of experience in software full-cycle development project management.
- Familiarity with programming languages in both VB.Net, Java.
- Familiarity with front-end frameworks (e.g. AngularJS, Bootstrap, Ionic Framework etc.).
- Familiarity with relational database software (e.g. Oracle, MySQL, any other relational database).
- Familiarity with cloud computing (e.g. Amazon Web Service, Microsoft Azure Cloud etc.).
- Familiarity with integration methods (e.g. RESTful APIs, SOAP, OAuth, and other methods).
- Familiarity with version control systems (e.g., Git) and development tools (e.g., Visual Studio, Eclipse etc.).
- Experience in database design and development.
- Preferable experience in development for logistics or supply chain management software.
- Preferable familiarity with Agile development methodologies.
