Job Description

COMPANY OVERVIEW

An established medium-sized company based in Jena with a history of over 30 years and part of a global group with production sites in Germany, Japan, and the USA is currently looking for a Cylindrical and Thread Grinding Technician (m/f/d). This company supplies products for drive technology to various industries including machinery, semiconductor, optics, medical technology, aerospace, and many others.

JOB RESPONSIBILITIES

- Machining of shafts of various lengths
- External cylindrical grinding of ball screw spindles on conventional cylindrical grinding machines with varying center distances
- Independent setup and preparation of measuring tools according to drawing specifications

- Independent and responsible measurement and inspection of all required functional dimensions
- Preparation of the product for further processing steps
- Cleaning and preservation of the machined workpieces
- Manufacturing of thread starts
- Maintenance and care of the equipment

JOB REQUIREMENTS

- Successfully completed technical training as a cutting machine operator, tool mechanic, or industrial mechanic, or interest in further developing your previously acquired skills
- Enjoyment in machining surfaces of workpieces and precision grinding
- Ability to read, understand, and implement technical drawings
- Capability to work independently and responsibly
- Independent, structured, and meticulous working style
- High level of commitment and team spirit
- Willingness to work in a three-shift system

Apply online or feel free to contact me directly for more information about this opportunity. Due to the high volume of applicants, we regret to inform that only shortlisted candidates will be notified. Thank you for your understanding.
