### Job Description

#### COMPANY OVERVIEW

A leading provider of innovative solutions for the industrial sector, this company specializes in comprehensive consulting and project development, creating tailored solutions for its clients. Additionally, the company excels in the production of state-of-the-art welding robots and automation systems. To ensure optimal utilization of these systems, the company offers comprehensive training sessions. Rounding off its service portfolio, the company provides first-class support services.

#### JOB RESPONSIBILITIES

- Part of our process development team, responsible for preparing products from our parent company for market launch.
- Independent management of various customer projects.

- Coordination and communication of technical changes with customers, international production plants, and internal departments.
- Overseeing modification work and creating change instructions and notifications.
- Root cause analysis and support in troubleshooting.
- Developing solutions and ideas for potential improvements and optimization measures for already launched products.
- Independently planning, conducting, and evaluating test series and experiments, as well as documenting and presenting results.
- Conducting market, competition, and trend analyses; assisting with marketing and sales activities.
- Close collaboration with application engineering, sales/marketing, and service teams.
- Building knowledge transfer through proactive communication and clear documentation.
- Participation in industry events and trade fairs.

#### **JOB REQUIREMENTS**

- Completed degree in electrical engineering or an advanced degree in electrical engineering is advantageous.
- Ideally, initial professional experience in product management.
- Experience in welding technology (welding methods/procedures, welding equipment) is desirable.
- Strong communication skills (excellent customer interaction) and a confident, friendly, and professional demeanor.
- Independent and solution-oriented work style, with a team-oriented approach.
- Willingness to continuously develop expertise in robotics/welding technology.
- Willingness to travel.
- Good IT skills and proficiency in standard software (MS Office).
- German and English Business proficiency

#### **BENEFITS FURTHER**

- Hybrid working style
- Paid leave: 30 days
- Holiday bonus and 13th month's salary

Apply online or feel free to contact me directly for more information about this opportunity. Due to the high volume of applicants, we regret to inform that only shortlisted candidates will be notified. Thank you for your understanding.
