Job Description

System Engineer Key Responsibilities
- Deliver comprehensive technical support, addressing troubleshooting needs and ensuring seamless system maintenance for clients.
- Lead the implementation of advanced engineering systems.
- Craft detailed documentation that supports operational efficiency, including configuration guides and implementation manuals.
- Collaborate closely with international partners and vendors, driving the design, deployment, and resolution of complex system issues.
- Serve as a technical resource for the Sales and Technical Sales teams, providing valuable insights and expertise to drive business success.

Required Skills and Qualifications
- Bachelor's or Master's degree in Computer Engineering or related fields.
- Experience in system support, implementation, or IT planning and management roles.
- Prior experience in the engineering software industry is a strong asset.
- Solid understanding of IT ecosystems, covering hardware, software, operating systems, servers, storage, networking, and databases.
- Familiarity with PDM, PLM, and CAD VDI technologies (e.g., Citrix, VMWare, HP Anyware) is a significant advantage.
- Excellent command of English, with strong communication skills both verbally and in writing
