Job Description

Position: Power Plant Manager
Responsibilities:

- Review and provide recommendations on the daily operating report to ensure accuracy and completeness, so that other departments can utilize it effectively.
- Provide advice and recommendations to other departments to ensure that production scheduling, maintenance, fuel procurement, and equipment upgrades are carried out comprehensively.
- Monitor operating goals and prioritize maintenance tasks to prevent any impact on production.
- Inspect and report any deviations from the planned operations, including abnormal situations and emergencies, to ensure that supervisors and relevant departments are promptly and accurately informed.
- Oversee, review, and evaluate the performance monitoring reports and identify opportunities for plant improvement.

- Control and provide guidance on root cause analysis, performance testing, and follow up on actions to resolve issues and assess losses within the plant.
- Propose safety, stability, and efficiency improvement projects, reduce costs, and review feasibility studies and budget documents for approval.
- Ensure responsibility for environmental and safety concerns in accordance with company policies.

Qualifications:

- Bachelor's degree in Science or Engineering.
- 7 years' experience in Maintenance Power Plant
- Have a leadership skill.
