Job Description

[About the company]

Business Overview.

Development and provision of advertising delivery platforms for Internet media

(2) Providing marketing support services for advertisers and advertising agencies

They support the development and introduction of the marketing automation system, the CRM/SFA and the chat tool.

[Specifically...]

In the realm of ad technology and digital marketing, they use cutting-edge technology to independently develop products that help our clients maximize their revenues.

In particular, they are focusing on platform business, which analyzes users' access to ad spaces in web media and smartphone applications and delivers the most appropriate ads in a real-time auction format.

In fiscal 2016, the core business expanded to the No. 1 scale in Japan.

In addition, they have developed six products in-house: "SSP," "DSP," "DMP," "Marketing Automation," "CRM/SFA," and "Chatbot" for domestic and overseas markets.

As of June 2019, they have six overseas offices in five countries, including Singapore, Vietnam, Indonesia, Thailand, and India. Even in rapidly growing Asia, we are working to maximize advertising revenue for local companies by leveraging Japan's advanced technological capabilities.

Going forward, they will continue to lead the field of ad technology both in Japan and abroad, and take on the challenge of exploring unknown areas.

[Job Description]

In this position, you will join the development team as a senior engineer to lead AI products that are evolving day and night, and lead the team to solve challenging technical problems in core functions.

You will be responsible for leading the development team to create a product that customers continue to choose in the competitive AI domain.

[Responsibilities]

You will focus on improving scalable business and technical capabilities to become a world-class company.

You will lead the identification and resolution of issues related to the technology strategy in order to strategically grow and develop the engineering organization from a technical perspective.

[Specifically]

Design and development of SaaS applications utilizing AI models

Design of product architecture and optimization of system integration

Continuous improvement and maintenance of code quality and performance

Research and evaluation of new technologies and their integration into the technology stack

Lead technical teams and assist members in technical growth and team building

[Development Environment]

Frontend: TypeScript, Next.js, React

Backend: Python

Infrastructure : GCP

Development tools : Slack, Confluence, Jira, Google Workspace, Github

Working environment

Mac (Apple Silicon)

Github Copilot and in-house GPT available

Up to 2 monitors available

*You will be transferred to JAPAN AI Corporation after being hired by the company for this position (location and work place are the same for both companies).

[About JAPAN AI]

The company is actively utilizing AI technology in its product development, providing AI-related functions in its own products, GENIEE SFA/CRM and GENIEE CHAT, such as automatic summarization of meeting minutes and automatic creation of emails using ChatGPT, to improve customers' operational efficiency and productivity.

Under these circumstances, the group established a new subsidiary, JAPAN AI Corporation, on April 11, 2023, to further promote consulting, product provision, and research and development related to AI technology.

JAPAN AI Co., Ltd. is developing and providing various AI products to improve the productivity of Japanese companies and revitalize industries with the goal of "handing down Japan and leapfrogging the potential of workers with AI". In order to develop advanced products, the company is also conducting research in areas such as ChatGPT, various large-scale language models, and GenerativeAI.

[Working time]

10:00~19:00

[Welfare]

- Full social insurance
- Commuting allowance
- Family Allowance
- Book purchase subsidy (up to 30,000 yen per half year)
- Refreshment allowance (up to 5,000 yen per month)
- Rent allowance
- Support system for acquiring qualifications and languages, and support for attending training courses (individual

application required)

- Working parents' support system
- Refreshment leave system
- Club activity allowance
- Other in-house events (monthly get-togethers, etc.)
- Use of Kanto IT Software Health Insurance Association's recreational facilities, affiliated sports clubs, etc.
- Regular health checkups (once a year)

[Holidays]

- Saturday/Sunday/National Holiday
- Annual Paid Leave
- New Year Holiday
- Summer Holiday
- Winter Holiday

Required Skills

[MUST]

- Bachelor's or Master's degree in Computer Science, Artificial Intelligence, Machine Learning or related field
- 5+ years of work experience in a technical role
- Proficiency in JavaScript, React, or other web technologies
- Proficiency in at least one back-end language (Python, Java, etc.)
- Experience with relational databases such as Postgres/MySQL
- Experience with cloud services (AWS, Google Cloud, or Azure) and understanding of container technologies (Docker, Kubernetes) is essential

[WANT]

- Interest in AI/ML
- Possession of relevant certifications in AI/ML, project management, or leadership
- Experience in leadership or management
- Ability to move quickly in an environment that is sometimes ill-defined and may have competing priorities and deadlines
- In addition to Japanese, English skills are a big plus

[Ideal Applicants]

- Love solving technically challenging problems
- Have a strong interest in cutting-edge technology
- Able to communicate and discuss smoothly with others
