Job Description

Key Responsibilities:

- Design and Development: Develop detailed designs for mechanical systems, including HVAC, plumbing, fire protection, and other systems.
- Create and review technical drawings, plans, and specifications using CAD software.
- Project Management: Coordinate with architects, structural engineers, and other stakeholders to integrate mechanical designs with overall project plans.
- Plan and manage project schedules, budgets, and resources. Supervise and provide technical guidance to subcontractors and on-site personnel.
- Oversee the installation of mechanical systems, ensuring they are completed on time, within budget, and to the required quality standards.

- Conduct regular site inspections to monitor progress and ensure compliance with specifications and safety standards.
- Quality Assurance and Control: Perform quality control checks on all mechanical systems and components. Troubleshoot and resolve issues related to mechanical systems during construction and post construction

Preferred Qualifications & Candidate Profile

- A bachelor's degree in mechanical engineering.
- Staying at the site location is necessary.
- Able to supervise and control the team.
- Proficiency in electrical design software (e.g., AutoCAD,)
- Strong knowledge of Indian electrical codes, standards, and safety regulations.
- Excellent project management skills, with experience managing large-scale construction projects
- 6-9 Years of experience
- Location: Sri City, Andhra Pradesh
