Job Description

Job Description

- Manage end-to-end implementation of SAP BODS solution including project planning, design, development, testing and deployment.
- Conduct workshops to collect and analyze customer requirements and translate them into functional and technical specifications.
- Designed and implemented Data Integration and Migration solutions using SAP BODS.
- Developing data extraction, transformation and loading (ETL) processes to integrate data from various sources into the SAP system.
- Ensure data quality and consistency through data cleaning and validation processes.
- Optimize your existing SAP BODS implementation for improved performance and scalability.
- Provide ongoing support and troubleshooting for SAP BODS solution, resolving issues and ensuring smooth operations.
- Comprehensive project documentation including design specifications, configuration guides and user manuals
- Develop and present project status reports highlighting major milestones, risks and deliverables.

- His main responsibilities include creating and presenting proposals for Business Objects Server (BO SS) components.

This is your chance to work as a data integration expert in a multinational company and work on cutting edge SAP BODS solutions!

Responsibilities:

- Manage the end-to-end implementation of SAP BODS solutions, including project planning, design, development, testing, and deployment.
- Conduct workshops to gather and analyze client requirements and translate them into functional and technical specifications.
- Design and implement data integration and migration solutions using SAP BODS.
- Develop data extraction, transformation, and loading (ETL) processes to integrate data from various sources into SAP systems.
- Ensure data quality and consistency through data cleaning and validation processes.
- Optimize existing SAP BODS implementations to enhance performance and scalability.
- Provide ongoing support and troubleshooting for SAP BODS solutions to resolve issues and ensure smooth operation
- Prepare comprehensive project documentation, including design specifications, configuration guides, and user manuals.
- Generate and present project status reports, highlighting key milestones, risks, and deliverables.
- Create and present proposals for Business Objects Server (BO SS) components as a primary duty.
