Job Description

We are looking for a full stack engineer, who can develop both front-end & back-end systems to join our diverse team in Tokyo.

Client Details

Our client is a global leader within the personal and commercial insurance sector. With a robust presence in Tokyo, they are committed to coming up with creative and innovative solutions for the customers to provide superior services. They are heavily investing in their employees through continuous learning and development.

Description

- Complete the end to end development of the product with cross-functional teams
- Develop scalable APIs for external and internal stakeholders
- Manage API catalogs and services
- QA & testing

- Troubleshoot and bug fix
- Collaborate with offshore teams to ensure delivery
- Maintain the up to date artifacts with clear documentation
- Follow the industry standards for development & managing the APIs/microservices

Job Offer

- Holidays/paid-leaves: Year-end and New Year holidays, special additional paid leave, annual paid leave, nursing care leave, childcare leave, etc.
- Social insurance: Health insurance, employee pension, unemployment insurance, workers' accident compensation insurance
- Hybrid working style (working from home once a week)

To apply online please click the 'Apply' button below. For a confidential discussion about this role please contact Nina Kato on +81 3 6627 6081.

Required Skills

- JLPT N3 level (or equivalent) Japanese level
 - Business level Japanese
 - Proficiency in programming languages (e.g., Java, python), and frameworks (e.g., Spring, Spring-boot, JPA).
 - Knowledge in databases: any SQL / No-SQL
 - Knowledge in containers, container orchestrations
 - Strong knowledge in SOAP & RESTful protocols, API management
 - Proven experience in development projects in insurance or financial related industries
 - Experience improving efficiency, reducing cost and/or integrating business units or capabilities within an organisation.
 - Experience in developing and operationalizing development strategies across various technology, infrastructure, and entities.
