## Job Description

This role involves defining product vision, gathering and prioritizing requirements, and acting as a bridge between business and technical teams to ensure alignment and timely delivery of features. It also includes project planning, risk management, resource allocation, and overseeing post-launch activities such as system maintenance and incident management.

### Client Details

A global leader in e-commerce, fintech, digital content, and communications, renowned for its innovation work environment. Join us to be part of a forward-thinking company that offers vast opportunities for growth and development in a diverse and inclusive culture.

### Description

- Define product vision, roadmap, and prioritize features.
- Act as a bridge between business and technical teams, gathering and documenting requirements.
- Communicate goals, progress, and priorities to stakeholders.

- Manage the product backlog, KPIs, and trade-offs for successful delivery.
- Oversee project planning, risk management, and resource allocation.
- Ensure timely feature delivery, system reliability, and post-launch support.

#### Job Offer

- Working time: 09:00-17:30
- Hybrid working style

---

#### Required Skills

- Basic understanding of programming, frameworks (e.g., Java, Python, React), and system architecture (APIs, microservices, databases, cloud).
  - Familiarity with SDLC, agile methodologies, and technical feasibility assessments.
  - Collaborate with engineers to define requirements, balance trade-offs, and ensure delivery.
  - Communicate technical concepts effectively to diverse audiences using storytelling and data-driven insights.
  - Align stakeholders, mediate conflicts, and set realistic expectations.
  - Inspire cross-functional teams and uncover user needs to drive product success.
-
