Job Description

We are looking for a talented DevOps Engineer to manage configuration, CI/CD pipelines, and production servers for security services. You'll also have a chance to work with cutting-edge technologies like Docker, Kubernetes, and Wazuh.

Client Details

A leading global enterprise in the cloud services industry, known for its innovative and scalable solutions. The company offers a dynamic, diverse work environment where professionals thrive and grow.

Description

- Develop and maintain configuration management with Ansible.
- Build and maintain CI/CD pipelines, integrating automated testing, deployment, and monitoring.
- Oversee containerization with Docker and Kubernetes for scalability and security.
- Manage production servers and Squid proxy, ensuring high availability, performance, and security.

Job Offer

- Competitive salary and long-term employment prospects.

- Opportunity to work in a cutting-edge, high-growth industry.
- Free meals and snacks, exclusive access to employee lounge, salon, and other benefits.

To apply online please click the 'Apply' button below. For a confidential discussion about this role please contact Taishi Oyamada on +813 6832 8665.

Required Skills

- Strong understanding of Ansible, Chef, and CI/CD tools like Jenkins or GitLab.
- Knowledge of managing Linux/Unix production servers.
- Familiarity with Docker, Kubernetes, and Squid proxy server management.
- Experience with Python, Bash, or similar languages is a plus.
- Great communication skill in English.
