Job Description

[About the Company]

Bose Automotive, LLC was established in 1992 as a wholly-owned subsidiary of the US-based Bose Corporation, a Japanese company specialising in car audio OEMs.

Its premium sound systems, designed exclusively for each vehicle model, have been installed in the top models of many car manufacturers and are currently sold in Japan and around the world by numerous car manufacturers with Bose sound systems.

[The company creates sound based on the following five product principles]

1. Making products that provide long-term customer satisfaction
2. Accurate reproduction of live music
3. Designing a total music system that encompasses circuit technology, speakers, cabin acoustics and listener listening characteristics
4. Custom design to develop the best possible system for each individual vehicle model
5. Creating a musical space in the cabin that evokes the emotion of live music

[About the Job...]

You will be responsible for the electrical PJT management of the in-vehicle amplifier development PJT (comprising mechanical/electrical/sound/software engineers). The main focus of the development PJT is to adapt the product to the required specifications of the customer, a Japanese car manufacturer.

[Key Responsibilities]

- Development of automotive audio and active sound management systems
 - Define electrical circuit specifications for amplifiers for complete vehicle manufacturers, clarify customer requirements and study the feasibility of realising them.
 - Developing audio specifications and customer requirements for the development department at the head office in the USA.
 - Checking the connection between the vehicle (car navigation system, etc.) and audio equipment.
 - Compilation of specifications, etc. * Negotiations with the US head office and the Mexican factory occur mainly via e-mail.
- *Basic research and advanced development of products are carried out in the home country.

[Working hours]

9:00~18:00

[Benefits]

Full Social Insurance
Commuting Allowance

[Holidays]

Saturday/Sunday/National Holiday
Annual Paid Leave
New Year Holiday
Congratulations & Condolence Leave
Refresh Leave
Summer Holiday

Required Skills

[Required]

- Experience in software development or project management

[Preferred]

- Bachelor's or Master's degree in electrical engineering or systems engineering.
- Experience in the automotive industry

[Features of the Company]

- As the largest supplier of premium in-vehicle audio, through next-generation technology the company makes the car not just a means of transport, but a music hall and special space for the passenger.
- The working environment is stimulating, with many people around you having a clear vision of their own career. You can develop your own career, both domestically and internationally, with your own abilities and discretion. Many mid-career employees have joined the company.
