Job Description

Job Summary:

- Our client in the construction industry is seeking an Electrical & Mechanical Supervisor. The ideal candidate will manage wiring installations, create wiring diagrams, assemble control panels, and work with PLC systems, requiring a strong engineering background and excellent leadership skills.

Responsibilities:

- Install wiring according to wiring diagrams for project or new machinery needs.
- Create wiring diagrams based on existing machine cabling.
- Design wiring diagrams for simple automation systems.
- Assemble control panels and motor drivers with high-quality standards.

- Work with PLC systems for machine automation and integration needs.
- Coordinate with the team to ensure projects are completed on time and meet specifications.
- Create simple technical reports related to the work done.

Requirements:

- Minimum education of an Associate Degree in Electrical Engineering or a related field.
- At least 3 years of work experience in wiring installation or completion of 3 new machinery installation projects.
- Proficient in creating wiring diagrams for electrical needs.
- Capable of designing simple automation wiring systems.
- Understanding of PLC concepts and able to perform basic configurations.
- Skilled in assembling control panels and motor drivers.
- In-depth understanding of AC & DC motors and motor drives.
- Passive English proficiency, especially for basic technical terms.
- Hardworking, disciplined, communicative, and responsible.
- Ready to work independently with a high level of honesty and dedication.
