Job Description

As part of the Onshore Asia Pacific Regional Unit, Japan project pipeline brings significant value to the business, thus the PM Hub Head in Japan is a key role and overall responsible for the successful management and delivery of a project pipeline

Client Details

Our client is a well-established, global organization with a strong presence in the renewable energy/ manufacturing sector. This company is renowned for its innovative products and solutions, and it has an extensive footprint across wind energy projects.

Description

- Develop and implement project strategies in the energy and natural resources sector
- Lead cross-functional teams for project execution
- Oversee the project life cycle from initiation to completion
- Manage project risks and develop mitigation strategies
- Build and maintain relationships with stakeholders
- Ensure project deliverables meet quality standards and client expectations
- Coordinate with other departments for resource allocation
- Contribute to business development and strategic planning

Job Offer

- A competitive salary range of approximately 13.5M - 16.5M JPY
- Comprehensive benefits package including 401k
- Opportunity to work in a global organization within the heart of Tokyo
- Exposure to innovative projects in the energy and natural resources sector
- Progressive company culture that values diversity and inclusion

If you are a strategic thinker with a passion for project development and a deep understanding of the energy and natural resources sector, we encourage you to apply for this exciting opportunity.
