Job Description

The Demand Planner will be responsible for managing the supply chain processes, ensuring efficient and cost-effective product distribution. This role is critical in maintaining the balance between inventory levels and customer demand in the fast-paced FMCG industry.

Client Details

This opportunity is with a large organization famous for the production of cosmetics and fragrances. The company is known for its commitment to luxury and quality, maintaining a strong presence in the FMCG industry.

Description

- Develop and execute demand forecasts based on historical sales, market trends, and promotional activities.
- Collaborate with cross-functional teams to align on demand forecast and inventory levels.
- Identify potential supply chain risks and propose mitigation strategies.
- Monitor and report on key supply chain metrics.

- Drive continuous improvement initiatives in the supply chain process.
- Manage relationships with suppliers and stakeholders.
- Ensure compliance with company and industry regulations.
- Participate in the development and implementation of strategic supply chain projects.

Job Offer

- An attractive salary range around 7,000,000 JPY, with flexibility depending on experience.
- The opportunity to work in a diverse and inclusive company culture.
- Comprehensive benefits package.
- The chance to grow your career in a prestigious global group.
- Be part of a team that values innovation and continuous improvement.

If you have the necessary skills and experience and you're ready for an exciting challenge in the FMCG industry, we encourage you to apply for the Demand Planner position.

To apply online please click the 'Apply' button below. For a confidential discussion about this role please contact Mike Corbyn on +813 6832 8601.

Required Skills

A successful Demand Planner should have:

- A degree in Supply Chain Management, Business Administration, or a related field.
- Proven experience in demand planning and supply chain management
- Strong analytical skills with the ability to manage large datasets.
- Proficiency in supply chain software and tools.
- Excellent communication and negotiation skills.
- A results-driven attitude and a commitment to quality.
