Job Description

Our client is offering IT service consulting to companies. They are currently seeking a Project Manager with expertise in Agile methodology and have the background experience in software development life-cycle. Oversees the software/ mobile application development project and others.

Location: Don Mueang, Bangkok.

Job Description:

- Manage the development of the products and projects proactively, keeping track of their progress and ensuring the quality of their deliverables.
- Collect customer business requirements and talk with the development team to translate them into technical solutions.
- Establish a thorough project plan, allot resources, and create thorough project documentation.
- Regularly inform stakeholders of project progress.

- Keep a risk/issue log as long as risks are preventatively reduced and problems are promptly fixed.
- Provide Agile methodology support to the project management and development teams.
- Assist senior management in analyzing team performance by facilitating scrum ceremonies and assisting in the creation of sprint closure reports.
- Work with the product owner to maintain the product roadmap and manage the product backlog.
- Arrange for approval to carry out production deployment.

Qualification:

- Direct 3 years' experience in Project Manager.
- Experience in mobile application development.
- Strong in Agile Methodology.
- Change Management, Risk Management.

Working: Monday - Friday (WFH 80%)
