Job Description

Our client, a global leader in e-commerce and digital services, is looking for Database engineer who manage and maintain Oracle database.

Client Details

Our client is global technology company, known for its e-commerce platform, online banking, digital content, and telecommunications services. They operates in multiple countries, so understanding cultural differences and multilingual support might be beneficial.

Description

- Proficient in enhancing database performance and ensuring optimal functionality.
- Having experience with ESS, GRID, and Oracle Home management.
- Tackling complex challenges in Oracle databases with precision.
- Skilled in maintaining high-performing ExaData environments.

Job Offer

- A dynamic, energetic working environment with good work/life balance
- Open culture and job rotation available to enable internal career development
- Competitive salary and benefits package
- Opportunity for growth and advancement within the company
- Collaborative and supportive team environment

To apply online please click the 'Apply' button below. For a confidential discussion about this role please contact Ayaka Iwaki at +81 3 6832 8658.

Required Skills

- Oracle DBA and/or Public Cloud (AWS, GCP, Azure, OCI) certifications are a valuable asset.
 - Practical experience with Oracle GoldenGate and Big Data technologies.
 - Proficient in automation using tools like Git, Jenkins, and Ansible.
-
