Job Description

We are seeking a skilled and resourceful IT Infrastructure Engineer to join our dynamic IT team. As a key player, you will be responsible for designing, deploying, and troubleshooting network and server infrastructure, ensuring smooth and secure IT operations.

Client Details

Our client is a leader in data-driven marketing, helping brands, retailers, and agencies optimize their strategies through personalized advertising solutions. By leveraging insights extracted from 10 trillion yen in purchasing data, they revolutionize shopper behavior and campaign effectiveness at every stage-planning, execution, and measurement.

Description

- Diagnose and troubleshoot L3-level network issues escalated from L1/L2 teams
- Monitor network performance and design upgrades & expansions
- Collaborate with internal teams and stakeholders to ensure smooth network operations
- Maintain Windows/Linux operating systems, virtualization (VMware, Hyper-V), and security settings
- Automate server tasks and improve operational efficiency
- Document IT solutions and best practices

- Provide technical support to internal users as needed
- Maintain the IT maintenance calendar and communicate updates to stakeholders

Job Offer

- Competitive annual income up to 12 million yen (including bonuses).
- Retirement allowance, commuting allowance, and flexible working hours.
- Training opportunities for IT skills and personal development.

To apply online please click the 'Apply' button below. For a confidential discussion about this role please contact Peryhan Essam on +813 6832 8691.

Required Skills

- Experience in IT Infrastructure
- Deep understanding of networking protocols, security, and troubleshooting methodologies
- Strong documentation and IT knowledge management skills
- Excellent problem-solving, analytical, and communication skills
- Fluent Japanese & Business English
