Job Description

At this position, you'll be joining a leading global IT company to provide technical troubleshooting and operational support for network and security infrastructures across a large-scale environment. Manage and optimize global network and security services while working on a diverse set of technologies.

Client Details

The company is a prominent global leader in the healthcare and pharmaceutical industry, with a focus on cutting-edge research and innovation. Known for its collaborative, forward-thinking culture, they provide employees with a dynamic work environment and opportunities for personal and professional growth.

Description

- Provide second-level troubleshooting for WAN, WLAN, LAN, VLAN, NAC, Firewalls, Proxies, and more.
- Create incident reports, escalate issues, and manage case resolutions.
- Support network and security infrastructure across global operations.
- Oversee Change and Incident Management processes to ensure system efficiency.
- Ensure compliance with security standards and company regulations.
- Administer, optimize, and manage network and security systems globally.

Job Offer

- Competitive compensation and benefits package.
- Huge opportunity for career growth and professional development.
- Dynamic global work culture and exposure to international projects.

To apply online please click the 'Apply' button below. For a confidential discussion about this role please contact Taishi Oyamada on +813 6832 8665.

Required Skills

- Solid expertise in routing protocols (EIGRP, BGP, MPLS, QoS) or LAN/WIFI technologies (Cisco/Juniper).
- Knowledge with firewall technologies, such as VPNs.
- Familiarity with ITIL processes.
- Experience as a network engineer in a large enterprise environment is a plus.
- CCNA or CCNP certification is also a plus.
- Strong communication and collaboration skills in English.
