Job Description

This role will be responsible for manual testing, ensuring its quality and stability. The role involves executing test plans, identifying defects, collaborating with cross-functional teams, and contributing to process improvements.

Client Details

The client is a leading global fashion brand, focused on creating stylish, high-quality products. They're known for their innovative approach to fashion and providing an exciting and fast-paced work environment.

Description

- The key responsibilities of this role include conducting manual testing for the Japan ECOM system, creating and maintaining test plans and cases, and identifying and reporting defects.
- This position also involves collaborating with cross-functional teams, participating in sprint planning, and ensuring the quality of the system through detailed testing and process improvements.

Job Offer

- Enjoy the flexibility of hybrid work - balance office and remote life.
- Be part of a global fashion brand, making an impact in the e-commerce space.
- A chance to grow your skills in a dynamic and fast-paced environment.

応募は、以下の応募ボタンからお願いします。詳細につきましては、Yiying Songにお問い合わせください+813 6832 8643。

Required Skills

- Strong experience in testing (functional, regression, integration, and end-to-end testing).
- Ability to design, document, and maintain test plans, test cases, and test data.
- Familiarity with JIRA for tracking testing progress.
- Collaboration with cross-functional teams (business analysts, developers, and project managers).
- Experience with QA methodologies and process improvements.
- Testing documentation skills, including defect reports, test case logs, and retesting.

Company Description

The client is a leading global fashion brand, focused on creating stylish, high-quality products. They're known for their innovative approach to fashion and providing an exciting and fast-paced work environment.
