### Job Description

We are a US Electronics manufacturing company providing high-technology interconnect, sensor, and antenna solutions to various industries such as Automotive, Broadband Communications, Aerospace, Defense, Industrial, IT, and Mobile Networks. Join us as a Process Engineer and be a part of our customer focused organization!

**Job Responsibilities**

- Continue to improve manufacturing process and equipment capability to achieve higher production yield and quality.
- Analyze, investigate and solve manufacturing process issues.
- Follow up and troubleshoot together with line technicians, if found any abnormality.
- Lead continuous improvement projects such as cost reduction, quality and productivity improvement (increase product yield/ reduce scrap).
- Responsible for new process and new product trial run.
- Establish training documents such as SOP, Work Instruction (WI), Plating Process Specification (PPS) and One Point Lesson (OPL).
- To educate and train production technician and operator in following proper manufacturing procedure.
- Update yield report for machine in-charged and prepare report for monthly meeting.
- Analyze, verify and reply the NCIR issued by QA and Line Leader.
- Setup vision system.

- Responsible for verification and given the green light for the line to run after dumping.

**Job Requirements**

- Degree in Chemical Engineering or Science
- Strong in problem solving and analytical mind
- Computer literature is a must
- Fresh graduate is encouraged to apply.
