Job Description

Looking for a senior engineer to manage and enhance a private cloud platform, ensuring reliability, scalability, and security. This role requires expertise in Kubernetes administration, Linux infrastructure, and automation for large-scale environments.

Client Details

A leading technology-driven enterprise with a strong commitment to innovation, offering a dynamic and global work environment. The team manages an internal cloud platform, ensuring seamless infrastructure operations for the company's large-scale systems.

Description

- Administer, maintain, and improve a large-scale container platform (Kubernetes, Linux).
- Perform infrastructure automation, monitoring, and troubleshooting.
- Handle system updates, security measures, and performance tuning.
- Ensure smooth operation of 100+ servers with high availability and reliability.
- Provide incident response, root cause analysis, and system documentation.

Job Offer

- Work with an innovative tech team in a global company.
- Remote work flexibility and support for overseas candidates.
- Weekends and holidays off, with a 9:00-17:30 work schedule.
- Free meals for breakfast, lunch, and dinner.

To apply online please click the 'Apply' button below. For a confidential discussion about this role please contact Naoko Toda at +81 3 6832 8648.

Required Skills

- 5+ years of experience in infrastructure administration (Linux/Kubernetes).
- Strong expertise in Kubernetes as an **administrator** (not just a user).
- Deep Linux OS administration knowledge.
- Familiarity with networking concepts, cloud platforms, and distributed systems.
- Programming skills with Golang or Python.
- Language: English Business Level/ Japanese not required
