### Job Description

As a senior backend engineer, you will:

- Design and develop the AI Agent Framework
- Build architectures for agent collaboration
- Implement and operate scalable runtime environments
- Work closely with researchers to translate cutting-edge advancements in LLMs and AI Agents into practical product features.
- Drive technical decision-making, improve development processes, and mentor other engineers to foster their growth.

### Required Skills

- A bachelor's or master's degree in Computer Science or a related field, or equivalent practical experience

- 5+ years of hands-on experience in backend development using Python or Java
- A strong foundation in algorithms, data structures, and computer science fundamentals, with the ability to implement them in real-world scenarios
- Experience with cloud platforms (AWS, GCP, or Azure) and container technologies (Docker, Kubernetes)
- A deep interest in LLMs and AI Agents, with a passion for staying up-to-date with the latest advancements in the field
