Job Description

COMPANY OVERVIEW
A well known global manufacturing company that sells Industrial product, Electronic Components, Industrial Components/Devices and Factory Automation Equipment across the world. With presence in 90 locations worldwide, our client is looking for experienced **IT MANAGER** to join their team in **KUALA LUMPUR.**

JOB RESPONSIBILITIES
- Manage the planning, deployment, and administration of all critical IT infrastructure components, such as servers, storage, and networks.
- Collaborate closely with other IT teams, such as cybersecurity and application development, to guarantee that infrastructure can accommodate new technologies and business initiatives.
- Overseeing the daily operational and project responsibilities of the IT Infrastructure team.
- Be the primary point of contact for escalation for business issues and managing internal and external communications.
- Supporting the administration of relationships with external organizations and suppliers.
- Lead and managing the IT Infrastructure division team and working closely with the other 2 teams (Application team & SAP HANA team)

JOB REQUIREMENTS
- Degree in computer science, information technology, or a related discipline.

- Minimum 5 years of experience in IT administration, with a particular emphasis on IT compliance, cybersecurity, and network and server management.
- Previous experience in the IT sector as a leader of an operations management team.
- Proven technical proficiency and knowledge of information technology (IT) systems, hardware, and software
- Strong communication skills (Proficiency in Mandarin will be an added advantage)
- Willing to travel for Annual Group HQ Meetings twice a year to either Korea, Japan or Singapore

Thank you!
