### Job Description

#### 1.) About the company

A Global Online Travel & Tourism company is seeking to expand its international team in Tokyo. They offer a travel booking platform that allows users to search and book economical flights, accommodations and reserve taxis.

Established over 20 years ago, their application has over 20 million downloads which led to their expansion opening 6 international subsidiaries world-wide. In 2023, they reached their highest profit margins - leading to 3 new services being released.

They are seeking Backend Developers, to work on their main service - the travel booking platform. You will work closely with other engineers to design, implement, and test new features, while also ensuring the stability and performance of existing systems.

2.) Who Are you

You are an experienced Backend Engineer.  
You are a self-motivated individual that enjoys working in a team.  
You are interested in the tourism industry, and how it can help the Japanese society.  
You like to follow and verify the latest theories and case studies.  
You are able to interview and work in Japanese.

3.) Why you should apply

Experienced leadership - from Amazon, Accenture, Salesforce  
Global Environment - Over 50% of the company are international employees.  
Engage in challenging projects that play a crucial role in the success of the organization.  
Previous management experience not necessary.  
Hybrid Workstyle

---

Required Skills

4.) Requirements

More than 5 years of engineering experience using PHP or Java for backend development.  
Experience in team development using Git  
Experience communicating in both English and Japanese (N3 minimum)

5.) Nice to have

Experience in database design  
Experience in introducing/using frameworks such as Spring Boot or Spring Framework  
Experience in development and operation with microservice architecture  
Experience in front-end development  
Experience in software design  
Experience in offshore development
