## Job Description

**COMPANY OVERVIEW**

a global company that provides a software/hardware platform to enable a carbon-neutral society through the development of batteries, which are core components of electric vehicles is looking for a Full stack Engineer (m/f/d) in Stuttgart.

**JOB RESPONSIBILITIES**

The role involves leading the design, development, and maintenance of our software platform. We are looking for a candidate who can take the initiative in designing and developing the software, while also expanding the team to achieve our goals.

- Frontend and Backend development
- Design and implementation of user interfaces
- Development and integration of RESTful APIs and AI services
- Database design and management
- System operations and feature additions related to AI chat

- Optimization of performance and security
- Design, development, and deployment of new features

## **JOB REQUIREMENTS**

Must have:

- Experience in frontend development using HTML, CSS, JavaScript
- Experience in designing and implementing RESTful APIs
- Knowledge of SQL and NoSQL databases
- Experience with Git and other version control tools
- Design and implementation experience with React and Python (2+ years)

Nice to have:

- Bachelor's degree in Computer Science or a related field
- Experience with cloud services (AWS, Azure, GCP)
- Experience with modern frameworks and libraries such as NestJS
- Experience with container technologies (Docker)
- Experience with CI/CD tools
- Understanding and experience with Agile development methodologies
- Skills in data analysis and visualization
- Experience with AI development tools
- Knowledge and practical experience in machine learning and deep learning

Due to the high volume of applicants, we regret to inform that only shortlisted candidates will be notified. Thank you for your understanding.
