Job Description

Company and Job Overview

Our client, a well-established petrochemical company based in Kuantan, Pahang, is seeking a Production Engineer. The role involves ensuring smooth and consistent operations by providing technical expertise in process operations.

Job Responsibilities

- Coordinate with EM for facility management and enhancements
- Address and resolve process disruptions
- Investigate and address customer complaints and feedback
- Ensure the correct issuance of Operation Instruction Sheets (OIS) for production activities
- Analyze, investigate, and implement corrective and preventive actions for key performance index monitoring items; report findings in the Engineer Monthly Report
- Propose and request Capital Appropriation Requests (CAR) and Resource Plans (RP)
- Conduct feasibility studies for debottlenecking and expansion projects
- Implement APQP for new grade development, process changes, and trial runs
- Serve as the Competent Person for monitoring, maintaining, and reporting on the Air Pollution Control System (Scrubber and Bag Filter)

Job Requirements

- Bachelor's degree in chemical engineering, Mechanical Engineering, or a related field
- Minimum of 3 years of experience in a manufacturing environment, preferably in polymer, chemical, or petrochemical plants
- Knowledge of equipment and manufacturing processes
- Ability to read and interpret technical drawings
- Familiarity with Quality Management Standards/ISO (OHS, EMS) and knowledge of IATF 16949, Automotive Quality Management System is a plus
- Certification as an Environmental Professional in Scrubber Operation (CePSO) and Bag Filter Operation (CePBFO) is advantageous
- Strong attention to detail, analytical skills, problem-solving abilities, and report-writing skills
- Performance-oriented with a focus on safety, cost, and quality
- Applicants should be Malaysian citizens or hold relevant residence status
