Job Description

As a product manager, you will be in-charge of a product and manager user stories and requirement gatherings. This position will require you to work together with other product managers in the team, project managers and the developers.

Client Details

My client is one of the biggest Retail company, famous for its products not only in Japan but globally as well. The team that is hiring for this role is responsible for their eCommerce product and looking continuously improving its products to become the top retail company in the industry.

Description

- Leads without authority in the product development, strategy, and redesign from concept through development and manufacturing to market launch.
- Develops products by identifying potential products, conducting market research, generating product requirements, and determining specifications, production timetables, and time-integrated plans for product introduction.

- Determines customer's needs and desires by specifying the research needed to obtain market information.
- Recommends the nature and scope of present and future product lines by reviewing product specifications and requirements.
- Assesses market competition by comparing the company's product to competitor's products.
- Brings new products to market by analysing proposed product requirements and product development programs, preparing return-on-investment analyses, and establishing time schedules with engineering and business units.
- Works with marketing and sales departments to ensure product success and market growth.
- Completes operational requirements and meets product development deadlines by scheduling and assigning employees, and following up on work results, including quality control and testing.
- Identifies and manages new and existing product partnerships.

Job Offer

- Hybrid working from home scheme
- Breakfast, lunch and dinner provided in the office
- Attractive compensation and benefits
- Great work life balance
