Job Description

Great opportunity to work in a leading IT company as senior Java Developer

Client Details

Our Client is a well-known leading IT E-commerce company

Description

- Design, develop, and maintain robust, scalable, and secure Java-based applications using Spring Boot and the Spring Framework.
- Implement and maintain RESTful APIs to support seamless integration with other systems and services.
- Ensure adherence to security best practices in all aspects of application development.
- Utilize containerization technologies like Docker to streamline application deployment and management.
- Work with relational databases, write efficient SQL queries, and ensure optimal database performance.
- Apply design patterns to create clean, maintainable, and reusable code.

- Collaborate with cross-functional teams to gather requirements, troubleshoot issues, and deliver high-quality solutions.
- Stay updated with the latest trends and advancements in Java development and related technologies.

Job Offer

- Competitive Salary
- Great work-life balance
- Social insurance, pension, commute & paid holiday fully covered
- International working environment
