### Job Description

- **Industry:** IT Consulting Company
- **Location:** Bangkok
- 

**Responsibilities:**

- Design and manage ETL (Extract, Transform, Load) processes within the Google Cloud environment to ensure efficient data integration.
- Develop and implement database schemas, and write queries for data retrieval and manipulation.
- Build data pipelines using Airflow, DBT, and various Google Cloud Platform tools (BigQuery, Storage, Dataflow, Pub/Sub, Cloud Functions/Run, Vertex AI, Cloud Build).
- Automate data workflows and processes using scripting languages such as Python and Bash.

- Utilize containerization (e.g., Docker) and orchestration tools (e.g., Kubernetes) for effective deployment and management of data applications.
- Work closely with data scientists, analysts, and other stakeholders to understand and meet data requirements.

**Requirements:**

- Minimum of 5 years of experience in data engineering, big data, and data warehousing.
- Extensive experience with cloud computing platforms, particularly Google Cloud Platform (GCP).
- Proficiency with data pipeline and workflow management tools (Airflow, DBT).
- Strong knowledge of data storage and processing.
- Expertise in Python and SQL.
- Excellent communication skills, with fluency in English.
