Job Description

Role: Design Engineer

Location: Neemrana

Role and Responsibilities:

- **Product and Technology Development:** Drive the creation of new products and technologies through experimentation, design, and testing.
- **Market Research:** Conduct market research to identify consumer needs and market trends.
- **Interdepartmental Collaboration:** Collaborate with other departments to discuss and refine product concepts.
- **International Collaboration:** Work closely with Japanese staff to develop new parts and win orders.
- **Customer and Supplier Meetings:** Gather information and align specifications through meetings with customers and suppliers.

- **3D CAD Modelling and Analysis:** Utilize tools like SolidWorks and AutoCAD for modelling, drawing, and strength analysis.

Required Skills:

- **3D CAD Proficiency:** Expertise in SolidWorks, AutoCAD, or similar tools.
- **Automotive R&D/Design Experience:** Proven experience in research and development or design of automotive parts.
- **Background in Vibration Engineering or Physics:** Strong knowledge in these areas.
- **Fluent English:** Excellent communication skills.
- **Analytical and Problem-Solving Skills:** Ability to analyze complex problems and devise innovative solutions.
