Job Description

A start-up global IT company is looking for **Software Engineers (Full Stack/Backend)** to develop high-performance banking and payment systems. If you're passionate about cloud-native technology and large-scale system modernization, this is your chance to make an impact!

Client Details

This foreign-own IT company operating in Japan is at the forefront of FinTech innovation, specializing in next-generation banking and payment platforms. With a multicultural team and an engineering-first culture, they provide an exciting environment where you can grow your skills and work on high-impact projects.

Description

- Design and develop secure, scalable core banking and payment solutions
- Collaborate in an agile team to modernize legacy systems using cloud technologies
- Work closely with international stakeholders and engineering teams

- Ensure high-performance APIs and robust software architecture
- Perform code reviews, testing, and troubleshooting

Job Offer

- Work Style: Hybrid/Remote (Flexible Work Hours)
- Global Team: Work with engineers from 20+ nationalities
- Career Growth: Opportunity to take ownership of high-impact projects
- Work-Life Balance: 72% paid leave utilization, flexible environment

To apply online please click the 'Apply' button below. For a confidential discussion about this role please contact Mana Chuabangon +81 3 6627 6080.

Required Skills

- 3+ years of experience as a Software Engineer
 - Proficiency in one or more: Java, Kotlin, Go, C# .NET, TypeScript, or Vue.js
 - Experience with AWS, GCP, Terraform, or OpenTofu
 - Business-level Japanese (N2+)
 - Team-oriented mindset and strong problem-solving skills
-
