Job Description

Job Description:

General basic training will be conducted for one to two months after joining the company.

After the training period, engineers will work at the technical service (on-site) while adjusting machines, etc. and get knowledge about pouch making machines.

Regarding practical work, training is mainly provided through OJT.

The main duties of technical services are mainly adjusting and operating pouch making machines and inspecting delivery (Installation?) to customers.

But this is not just a job as an adjuster; creative development and technical skills are required.

Many Overseas business trip and they will go overseas from around the second year with the company.

Requirements:

- Mechanical engineering background
- Indonesian native with English or Japanese business level language skill
- Fresh graduates OK (it is a plus to have service engineer experience, many experience is not expected)
- Willing to repair and assemble machinery by themselves.
- Willing to work in Japan for mid to long period (visa and relocation is supported) (there is a possibility of being transferred to

an overseas base in the future)

Company Description
