Job Description

As a Cybersecurity Engineer, you will design, implement, and optimize security measures to safeguard critical systems across a global FMCG enterprise.

Client Details

A top-tier FMCG company with a strong global presence, providing millions of consumers with essential products daily. With a commitment to innovation, digital transformation, and security, this company invests heavily in IT infrastructure to protect data, optimize operations, and ensure compliance.

Description

- Manage and strengthen network security infrastructure, including firewalls, and endpoint security solutions.
- Monitor and respond to security incidents, ensuring rapid resolution and minimal disruption.
- Assess vulnerabilities and implement security enhancements to mitigate risks.
- Develop and maintain security policies, procedures, and compliance frameworks.
- Collaborate with global IT teams to ensure a unified cybersecurity strategy across all markets.

Job Offer

- Competitive compensation based on abilities, experience, and knowledge
- The office is in central Tokyo, easy access
- Package up to 10 million JPY , depending on experience and background
- 2 days off per week, national holidays, year-end and New Year holidays paid vacations
