Job Description

Drive innovation in network infrastructure for a leading e-commerce company. We are looking for a Network Engineer to optimize and secure network operations, ensuring seamless connectivity for a fast-paced digital business.

Client Details

A major player in the e-commerce industry, the company delivers cutting-edge online solutions, enhancing customer experiences with high-performance infrastructure and secure digital transactions. With a focus on automation, and network security, the company is expanding its IT team to support rapid growth and innovation.

Description

- Implement and validate network solutions in traditional and cloud environments.
- Conduct capacity management and research new network solutions.
- Coordinate the deployment of network design changes with the operations team.
- Provide mentoring and training on new design solutions and implementation guidelines.
- Proactively address network issues and risks, including capacity management and issue detection.

Job Offer

- Many employee benefits and perks
- Work from home 2 or 3 times a week
- We offer competitive benefits and the opportunity to work with cutting-edge technologies in a dynamic and collaborative environment.

To apply online please click the 'Apply' button below. For a confidential discussion about this role please contact Peryhan Essam on +813 6832 8691.

Required Skills

- 5+ years of experience in data communications systems development, management, and implementation.
 - Strong experience with routing, switching, load balancers, WAN optimization, and security layer.
 - Solid knowledge of data center switching, branch networking, and enterprise wireless solutions.
 - Excellent communication skills and ability to work with internal and external stakeholders.
 - Proficiency in configuring and troubleshooting QoS for WAN and LAN networks.
