Job Description

Unlock your potential in a globally renowned asset management firm with over a century of legacy. As a pioneer in European asset management, we offer a dynamic environment where you'll lead IT security initiatives, shaping the future of digital solutions in Japan.

Client Details

Founded in Europe a century ago, we are the largest independent European asset management firm. Our Tokyo office, thriving for 40 years, plays a key role in providing unique asset management services to institutional investors, managing over 2-3 trillion yen in assets with a team of over 150 professionals.

Description

- Establish and lead a Security and Incident Management team in the Japan office
- Develop and execute security incident response plans
- Detect, investigate, and report security incidents, implementing preventive measures
- Strengthen collaboration with internal and external stakeholders through security training
- Enhance IT management operations and governance
- Drive system development and operation based on DevOps, tailored to Japan's business environment

- Collaborate with the European headquarters on system and application development, implementation, and operations

Job Offer

- Competitive compensation based on abilities, experience, and knowledge
- The office is in central Tokyo, easy access
- Package up to 16 million JPY , depending on experience and background
- 2 days off per week, national holidays, year-end and New Year holidays paid vacations (20 days per year)
- Take your career to new heights in an organization that values innovation, expertise, and collaboration. Apply now to be a part of our dynamic Digital Solutions Division.

To apply online please click the 'Apply' button below. For a confidential discussion about this role please contact Peryhan Essam on +813 6832 8691.

Required Skills

- Minimum 3 years of working experience in the IT security field
 - Practical knowledge of incident response (3+ years)
 - Experience in security auditing and risk assessment (3+ years)
 - Business-level Japanese and English
 - Excellent communication skills
 - Knowledge of AWS security-related services preferred
 - CISSP, CISM, CISA, or equivalent information security certification preferred
-
