Job Description

We are looking for a Cloud Engineer to support and optimize cloud infrastructure, ensuring scalability and reliability for high-traffic online services.

Client Details

A global e-commerce and digital services powerhouse, this company is known for its cutting-edge technology, large-scale cloud infrastructure, and diverse service offerings.

Description

- Support and maintain cloud infrastructure, ensuring high availability and performance.
- Deploy, monitor, and troubleshoot cloud-based applications across large-scale environments.
- Work with teams to optimize cloud architecture and improve system efficiency.
- Collaborate with vendors and internal teams to enhance cloud operations.
- Ensure security best practices are implemented in cloud environments.

Job Offer

- Hybrid work style with flexible hours for work-life balance.
- Exposure to large-scale cloud environments in a high-impact industry.
- Opportunities for career growth in a fast-paced tech ecosystem.
- A diverse, international workplace that encourages innovation and collaboration.

To apply online please click the 'Apply' button below. For a confidential discussion about this role please contact Peryhan Essam on +813 6832 8691.

Required Skills

- 1-2 years of experience in cloud engineering, system administration, or related fields.
- Basic understanding of AWS, GCP, or other cloud platforms.
- Familiarity with containerization (Docker, Kubernetes) and CI/CD pipelines.
- Strong problem-solving skills and a passion for cloud technologies.
- Business-level Japanese & Business-level English to work with off-shore team.

Company Description

A global e-commerce and digital services powerhouse, this company is known for its cutting-edge technology, large-scale cloud infrastructure, and diverse service offerings.
