Job Description

Company and Job Overview

A leading company in the advanced manufacturing industry is seeking a Manufacturing Manager to join a new start-up division. This role involves overseeing production operations to ensure efficient, cost-effective manufacturing processes while maintaining high-quality standards. The ideal candidate will have a strong background in manufacturing, excellent leadership skills, and a proven ability to drive process improvements and innovation. This is an exciting opportunity for a professional looking to contribute to a company known for its high-quality products and innovative solutions.

Job Responsibilities:

- **Leadership and Team Management:** Manage and lead the manufacturing team, including production operators and technicians. Provide guidance, support, and coaching to team members.
- **Production Scheduling:** Develop and oversee production schedules, ensuring on-time delivery and adherence to production targets.
- **Quality Assurance:** Collaborate with the Quality Assurance department to maintain high product quality standards. Ensure that all products meet specifications and quality requirements.
- **Engineering Team Leadership:** Lead the engineering team to high levels of performance and ensure effective and

efficient project management processes, ensuring the voice of the customer is inherent in all design efforts.

- **Safety Protocols:** Promote and enforce safety protocols to create a safe working environment for all employees. Conduct safety audits and investigations as necessary.
- **Inventory Management:** Monitor inventory levels and work with the inventory control team to optimize stock levels and minimize waste.
- **Process Improvement:** Identify areas for process improvement and collaborate with the Manufacturing Manager to implement efficiency-enhancing measures.
- **Training and Development:** Oversee training and development of manufacturing personnel, including cross-training to ensure a versatile workforce.
- **Equipment Maintenance:** Oversee equipment maintenance schedules and coordinate repairs as needed to prevent downtime.
- **Budget Management:** Manage the manufacturing budget by controlling costs, optimizing resource allocation, and minimizing waste.
- **Cross-functional Communication:** Maintain effective communication with cross-functional teams, including Supply Chain, Engineering, and Maintenance, to ensure a seamless production process.

Job Requirements:

- Bachelor's degree in a related field (e.g., Industrial Engineering, Operations Management) or equivalent work experience.
- Proven experience in a manufacturing or production environment, with at least 8 years in a supervisory or leadership role.
- Strong knowledge of manufacturing processes, quality control, and safety procedures. Excellent communication, leadership, and team management skills.
- Proficiency in using manufacturing software and tools (e.g., ERP systems)
