Job Description

- Lead the architecture and design of AI/ML solutions, from concept to deployment.
- Perform data cleaning, chunking, and pipeline creation for large datasets.
- Design and deploy AWS cloud computing strategy encompassing architecture design, deployment, security, high

availability, disaster recovery, and related features.

- Collaborate with cross-functional teams to understand business requirements and translate them into technical solutions.
-

Required Skills

- Proficiency in programming languages such as Python.
 - Knowledge of AWS cloud computing platforms and related AI/ML services.
 - Experience with MLOps tools and practices for model deployment and monitoring.
 - Understanding data engineering principles and tools for handling large datasets.
 - Knowledge of relevant AI/ML algorithms and techniques (e.g., CNNs, RNNs, Transformers)
 - Cloud platforms (AWS, Azure, GCP, etc.) • Infrastructure as Code (Terraform, CloudFormation, ARM Templates)
 - Containerization and orchestration (Docker, Kubernetes)
 - Security (IAM, access control, encryption, security auditing)
 - Basic DevOps practices and tools (CI/CD)
-
