Job Description

A Senior Project Development Manager for Onshore Wind is sought to lead and manage the entire life cycle of onshore wind energy projects. The role requires a strategic thinker with a strong background in renewable energy and an ability to work in a multicultural environment.

Client Details

Our client is becoming a key player in the renewable energy market, specializing in Solar, Wind and BESS. They are highly regarded for their innovative and sustainable solutions, and their commitment to a greener future. With a global presence, they are headquartered in Minato-ku.

Description

- Lead the development of onshore wind energy projects from inception to operation.
- Develop and implement project plans, manage risks and oversee budgets.
- Build and maintain relationships with project stakeholders, including local communities, governmental bodies and suppliers.
- Work in cooperation with the Sales department to secure necessary agreements.
- Coordinate with internal teams to ensure project progress according to the plan.
- Conduct market research and analysis to identify new project opportunities.
- Ensure compliance with all relevant regulations and industry standards.
- Report project status and developments to senior management.

Job Offer

- Competitive salary range with generous performance bonus.
- Standard benefits package including health insurance, pension, and transportation allowance.
- Opportunity to contribute to a greener future in the professional services industry.
- A multicultural work environment in the heart of Minato-ku.
- The chance to lead and influence projects of significant scale and impact.

We are excited to hear from passionate individuals who are ready to take their career to the next level. Don't miss this unique opportunity, apply now

To apply online please click the 'Apply' button below. For a confidential discussion about this role please contact Francois Fleury at +81 3 6832 8674.

Required Skills

- A degree in Business, Engineering, Environmental Science or a related field.
- Proven experience in leading and managing wind energy projects (onshore or offshore).
- Strong knowledge of renewable energy market and regulations.
- Excellent project management skills.
- Ability to establish and maintain strong relationships with stakeholders.
- Strong strategic thinking and problem-solving skills.
- Excellent communication skills in both Japanese and English.
