## Job Description

This is a Product Manager role focused on leading the strategy, roadmap, and execution for the Data Collection components (SDKs, event receivers, redirect services) of a large-scale analytics platform used across web and mobile. You will drive innovation, enhance developer experience, and collaborate cross-functionally to ensure seamless integration and high-quality data ingestion.

**Client Details**

A global leader in e-commerce, fintech, digital content, and communications, renowned for its innovation work environment. Join us to be part of a forward-thinking company that offers vast opportunities for growth and development in a diverse and inclusive culture.

**Description**

- Define and execute product vision and roadmap for Data Collection (Web/Mobile SDKs)
- Manage stakeholder communication across engineering, frontend, SRE, and marketing teams
- Prioritize and manage backlog based on business value and technical feasibility
- Analyze developer feedback and implement improvements in product and documentation
- Ensure high SDK performance, data quality, and developer satisfaction through KPIs
- Handle incident response and maintain developer communication during issues
- Provide technical support and guidance to internal teams and clients
- Monitor market trends and lead continuous SDK evolution

**Job Offer**

- Working time: 09:00-17:30
- Hybrid working style

To apply online please click the 'Apply' button below. For a confidential discussion about this role please contact Jeff Liao at +81 3 6832 8607.

## Required Skills

- Experience in product management, especially in B2B environments
- Strong background in managing analytics products (e.g., GA, Amplitude, Adobe Analytics)
- Skilled in handling outages and high-scale data ingestion systems
- Technical expertise in web/mobile data collection and performance optimization
- Proven ability to work closely with developers and enhance product value
- Strong documentation, communication, and stakeholder management skills
- Bachelor's degree in CS/Engineering or equivalent experience

## Company Description
