## About NCR VOYIX Corporation

NCR VOYIX Corporation (NYSE: NCR) is a global technology company leading how the world connects, interacts and transacts with business. NCR's assisted- and self-service solutions and comprehensive support services address the needs of retail, financial, travel, healthcare, hospitality, entertainment, gaming and public sector organizations in more than 100 countries. NCR ([www.ncrvoyix.com](http://www.ncrvoyix.com)) is headquartered in Duluth, Georgia.

This position will focus on developing Next Generation of point in sale systems. You will play a key role in designing, coding, system performance scaling, and problem-solving by applying the latest software development principles, theories, and concepts to job assignments. The role will require understanding requirements, enhancing existing software and developing microservices with the latest software stack for Digital Retail using Go, JavaScript/TypeScript, and Cloud technologies. You will also work with Engineering teams on developing back-end APIs that can support thousands of transactions and Next-Gen Products based on requirements from Product Management and engineering.

## Required Skills

### Required Skills and Experience:

- Bachelor's Degree in Computer Science or related field. Master's degree preferred.
- 10+ years of experience in Product design and development
- Deep understanding of Computer Science fundamentals
- Strong development, debugging and troubleshooting skills
- Excellent written, verbal communication skills.
- Able to work in teams and collaborative fashion.
- Analyze, design, and implement software mechanisms to improve code stability, performance, and re-usability. Participates and leads code review sessions.
- Support System Testing by designing for testability and leading the march to full test automation of developed code.
- Significant Microservices architecture experience.
  - Review, refine and evangelize patterns to scale application development; Passionate technical leadership to educate and direct teams for the microservices realization.
  - Experience migrating a Monolith architecture to a Microservices architecture desirable
  - Experience in testing of microservices and its integration with DevOps CI/CD pipeline, including Jenkins/Harness
- Experience in building applications based on Containers: Docker, grpc, Redis
- Performance Optimization
- Database Design experience
- Pub / Sub architecture and design best practices.
- Champion of Agile Scrum methodologies
- Experience with Cloud development.

### Languages/Technologies:

- Golang Microservices
- Bitbucket/JIRA/GIT Workflow
- Docker
- Kubernetes
- Google Cloud Platform
- MQTT messaging

### Preferred Qualifications

- Experience with Designer Specialty Retail and Food & Drug POS solutions (payments, eWIC, loyalty, promotions, etc.)
- Experience with POS and Self-Checkout Integrations.
- Experience with GCP Cloud development.

### EEO Statement

Integrated into our shared values is NCR's commitment to diversity. NCR is committed to being a globally inclusive company where all people are treated fairly, recognized for their individuality, promoted based on performance and encouraged to strive to reach their full potential. We believe in understanding and respecting differences among all people. This concept encompasses but is not limited to human differences with regard to race, ethnicity, religion, gender, culture and physical ability. Every individual at NCR has an ongoing responsibility to respect and support a globally diverse environment.
