Job Description

【求人No NJB2291025】

Major responsibilities

As the manager for Product Project Management of ZEV Powertrain (currently focusing on battery electric propulsion) you will be responsible for leading planning and executing projects series changes in regards to the charging system high voltage battery and eAxle.

Your role will involve managing these components from early product development stages (QG9) through to Series

Production (SOP) for new products and SOP until end of production (EoP) for existing products.

You will work to ensure that all business and functional related targets timeline and strategic directions align toward a unified successful outcome. Facilitate cross functional exchange especially for critical issues or conflicting targets within all functions and the project management organization.

Coordinate discussion and exchange within matrix organization and secure support from top management.

Department Introduction

We are responsible for product strategy project and series management down to EoP of all Fuso related powertrain aggregates either conventional ones (diesel) or ZEV's for all markets vehicles and applications.

We take care by defining the products way forward target pictures and ensuring that our strategy is executed in collaboration with cross functional teams where customer needs project targets are fulfilled as well as delivered on time. By an highly motivated diverse and international team your individual contribution is not only appreciated but also expected learning growth opportunities are enormous.

Lead of 3 directs department with approx. 15 people is responsible for overall powertrain strategy product management.

Cross functional collaboration with all relevant line functions is essential committee reporting according preparation is major part of this role.

Required Skills
