#### Job Description

The Leather Technologist (Technical Sales) role involves providing expert technical guidance and solutions to customers across industries, focusing on leather processing from tanning to finishing. You will drive sales by conducting application trials, offering troubleshooting expertise, and developing innovative leather technologies for a variety of clients.

#### Client Details

A leading provider of innovative chemical solutions for the leather industry, the company specializes in sustainable and high-performance products. With a strong presence in Japan, it serves various industries, including automotive, home furnishing, apparel, and accessories. The company operates a state-of-the-art application lab in Hyogo Prefecture, where it collaborates closely with clients to develop, test, and refine leather processing technologies, ensuring top-quality results. It is committed to driving advancements in leather technology and sustainability.

#### Description

- Use your technical knowledge to help customers with leather processing, from tanning to finishing.
- Run tests with customers to find the best solutions for their needs.
- Solve technical problems related to leather production.
- Develop new leather technologies that are more sustainable.
- Help customers with color matching and other leather-related issues.

#### Job Offer

- An estimated salary range of 4,500,000 - 6,000,000 JPY
- A positive and supportive company culture
- Opportunities for professional development and advancement
