Job Description

This position sits in the IT team of the brokerage team. It focuses on overseeing and managing the use of data from various external partners. The role requires a strong understanding of financial market data, vendor management, and data analytics.

Client Details

This position is with one of Japan's leading financial institutions. The company employs approximately 20,000+ staff worldwide, with regional headquarters in Hong Kong, London, and New York.
The company provides a wide range of financial services to individual, corporate, and institutional clients, and operates on a global scale.
With a strong foundation built on decades of trust and success, the firm is actively investing in digital transformation and technology-driven innovation.
You'll have the opportunity to work on cutting-edge projects within a stable organization that offers an international and forward-thinking environment.

Description

- Relationships Management: Oversee daily interactions with market data suppliers and internal teams.

- Contract Management: Handle renewals, terminations, and new agreements, working closely with Legal teams to minimize risks.

- Optimize Data Usage: Analyze and monitor market data usage to ensure efficiency and maintain data quality.

- Collaborate with Operations: Work with Market Data Operations and Business Analysts to evaluate and manage service requests.

- Support Projects & Reporting: Contribute to cross-functional projects, generate reports, and support automation initiatives.

Job Offer

- Large Financial Institution
- Excellent Benefit
- Working with Oversea Stakeholders
- 80% Work From Home
- Competitive Benefit Package, including paid leave, pension support, training etc.
- Convenient Location
