Job Description

Manage customer's network architecture and is responsible for the implementation of all design-impacting changes, architecture reviews, capacity management, etc. for the customer. The technical scope includes LAN and WAN engineering, SDWAN, IP Services (DNS, DHCP), Wi-Fi and various other network-based technologies.

企業情報

One of the top global IT services companies, with operations in over 50 countries. They operate across multiple industries: healthcare, banking, telecom, aerospace, and more.

職務内容

- ・ Design and hands-on implementation of customer networks (WAN, LAN, data centre, IPT, etc.)
- ・ Creating documentation for the implementation of the customer's network

Support and coach other engineers in the team at a technical level to provide professional engineering support to enable organisation to provide high quality services/solutions to our customers

- Responsible for technical strategies on complex projects
- Manage the technical deliverables on complex customer design and implementation projects.
- Pro-actively drive the development of the engineering role together with internal stakeholders
- Fourth-level support for Operations in the Incident and Problem Management Process

条件・待遇

- Roles span across tech domains-cloud, cybersecurity, AI, data analytics, software development, and engineering.
- They have structured training programs for freshers and continuous upskilling for experienced professionals.
- Flexible work options (remote/hybrid roles),

To apply online please click the 'Apply' button below. For a confidential discussion about this role please contact Jonathan Chua on +813 6832 8931.

Required Skills

- Advance Technical Knowledge on Cisco ACI fabric, leaf and spine configuration, and good experience in DC LAN migrations
- Advance Technical Knowledge of Cisco SD-WAN (Viptela, IOS-XE)
- Advance Technical Knowledge and experience at CCNP or similar level with focus on contemporary technologies (e.g. SDWan, NFV, MPLS, TCP/IP, GRE/IPSec, DMVPN, BGP, QoS, etc.)
- Experience in the design and implementation of large-scale customer networks
- Working knowledge of HPE Aruba Networking Wifi would be ideal
- Basic knowledge of business processes (e.g. ITIL, Project Management) and the impact thereof on the technical environment"

Company Description
