### Job Description

**Duties and Responsibilities:**

- Design and implement SAP Datasphere solutions tailored to client needs.
- Lead client workshops to gather requirements and provide insights on SAP Datasphere capabilities. Collaborate with clients to develop data analytics strategies and solutions.
- Manage multicultural, multilingual, and multi-geo project teams to ensure timely and successful delivery of SAP Datasphere projects.
- Manage large-scale ERP transformation and data estate modernization projects.
- Provide technical leadership and mentorship to junior team members.

- Engage in business development activities to identify new opportunities and expand client relationships.
- 

## Required Skills

### Requirements and Qualifications:

- 3-10 years of experience in SAP Datasphere and/or data analytics, with a strong track record of delivering successful projects.
- Proficiency in SAP Datasphere and data modeling.
- Experience in large ERP transformation or data estate modernization projects.
- Familiarity with working with or alongside Hitachi, Fujitsu, or other similar Japanese SI vendors on large-scale ERP deployment projects.
- Ability to manage multiple projects and teams effectively.
- Strong communication and leadership skills.
- Bilingual proficiency in Japanese (N2 or above) and English, with native-level proficiency in one and fluent-level proficiency in the other. Japanese natives with conversational English welcome.

### Educational Profile:

- Bachelor's degree in Computer Science, Information Technology, or a related field.
-
