Job Description

Lead accounting and reporting, and work closely with the report line for FP&A matters | Global environment, be a key player, WFH and flex time available

Client Details

A globally recognized nonprofit organization in biomedical research plays a key role in advancing science through the provision of specialized models, custom research support, and data-driven tools for the life sciences sector. Its work spans critical areas such as oncology, neurodegeneration, and immune-related diseases, and it is also actively involved in training and education for researchers worldwide.

In Asia, the organization has built a strong and growing presence, further reinforced through the integration of a local research services business. With multiple operational sites across the country, it supports academic, clinical, and commercial partners by offering high-quality preclinical resources. The organization continues to invest in regional scientific collaboration, working closely with leading institutions to drive innovation in biomedical discovery and personalized medicine.

Description

- Manage regular financial closing and reporting processes.
- Handle tax-related tasks and ensure compliance with relevant regulations.
- Maintain accurate accounting records and ensure data integrity.
- Oversee daily finance operations, including team supervision and vendor management.
- Prepare financial reports, business updates, and presentation materials for management.
- Support planning, budgeting, forecasting, and performance analysis in collaboration with other departments.

Job Offer

- Career pathway
- WFH and flex time available

To apply online please click the 'Apply' button below. For a confidential discussion about this role please contact Karisa Djohan on +81 3 6832 8605.

Required Skills

- At least 5 years of experience in financial reporting, preferably in a manufacturing setting.
- Knowledge of financial planning and forecasting is beneficial.
- Solid understanding of local accounting standards.
- Skilled in data analysis and proficient in Excel.
- Comfortable using English in a business context, including meetings and written communication.
- Familiar with Microsoft Office tools, and experience with ERP systems or data visualization tools is a plus.
