### 募集要項

The consultant contractor will manage business data analytics with a focus on Business Intelligence (BI) technical aspects, including CRM data and systems.

Key tasks involve designing and implementing data warehouse architecture and BI tools.

#### Principal Deliverables:

##### 1. System Design and Implementation:

- Develop a comprehensive DWH and BI platform, including data models and analytics tools.
- Implement dashboards and reporting tools tailored to business needs.

##### 2. Project Management:

- Lead and manage global BI projects, ensuring effective collaboration and timely execution.

**3. System Migration:**

- Oversee the migration from legacy BI platforms to modern cloud solutions.

**4. Maintenance and Support:**

- Provide ongoing system maintenance and support, ensuring optimal performance and user satisfaction.

---

スキル・資格

- Proven experience in ETL development and data warehousing.
- Expertise in dashboard development using BI tools like PowerBI.
- Experience in managing BI projects, preferably in the retail industry.
- Strong analytical skills and user-oriented communication.
