募集要項

Main responsibilities include:

1. ERP System Design and Implementation:

- Lead the design and architecture of the ERP system, considering organizational needs and industry best practices.
- Collaborate with key stakeholders to gather and analyze requirements, ensuring alignment with business objectives.
- Oversee the implementation of ERP solutions, providing guidance to development teams and ensuring adherence to architectural standards.
- Provide technical leadership, mentorship, and guidance to technology teams, fostering a culture of innovation,

collaboration, and continuous improvement.

2. Integration and Interoperability:

- Design and implement integration solutions between ERP and other business systems, fostering seamless data flow and communication.
- Evaluate and recommend third-party applications or tools to enhance ERP functionality and interoperability.
- Identify potential technology risks and develop risk mitigation strategies to minimize exposure to operational disruptions.

3. Performance Optimization:

- Continuously assess and optimize the performance of the ERP system, identifying and resolving bottlenecks or inefficiencies.
- Collaborate with infrastructure and database teams to ensure the scalability and reliability of the ERP architecture.
- Define and monitor key performance indicators (KPIs) for technology solutions, evaluating their performance and suggesting improvements as needed.

4. Security and Compliance:

- Develop and implement robust security measures for the ERP system, ensuring data integrity and compliance with industry regulations.
- Stay updated on security best practices and proactively address potential vulnerabilities.

5. Stakeholder Collaboration:

- Work closely with business leaders, end-users, and IT teams to understand evolving business needs and translate them into effective ERP solutions.
- Provide guidance and support during the user acceptance testing (UAT) phase, addressing any issues and ensuring successful system adoption.
- Collaborate with vendors, partners, and third-party service providers to evaluate products and services, ensuring they meet the organization's technical requirements and standards.

6. Documentation and Training:

- Create comprehensive documentation for the ERP architecture, configurations, and processes.
- Develop and deliver training programs for end-users and IT staff to promote a thorough understanding of the ERP system.

スキル・資格

Education/Qualification:

- Bachelor's or higher degree in Computer Science, Information Systems, or a related field.
- Relevant certifications in ERP systems and architecture.
- Language skills: English (Business Level), Japanese (Conversational Level)

Experience:

- Proven experience (5+ years) as an ERP Architect or in a similar role.
- In-depth knowledge of ERP systems, with expertise in one or more leading ERP platforms - SAP S/4HANA, Oracle, Infor.
- Experience with ERP system integration, data migration, and performance optimization.

Advantages abilities:

- MSc/MA/MBA is a plus
- Experience in Bottlers Industry preferred
